

Valentines

Pen Wrap Patterns

www.beadspider.co.uk

Requirements

Size 11/0 Miyuki Delica Beads
Pilot G2 Pen
SpiderLon Beading Thread
Beading Needle
Thread Conditioner (Optional)

A video demonstrating the techniques in this pattern is available at:
www.beadspider.co.uk/video-tutorials/bead-weaving-even-count-peyote-stitch/

NOTE: These designs are suited to fit perfectly around a Pilot G2 Pen when made with Size 11/0 Miyuki Delicas. Each design is 42 rows long and 21 rows wide. This is to leave space to add a beaded picot to the top and bottom of your pen wrap if you wish. If you do not wish to add picots to your pen wrap feel free to add two extra rows as a peyote border on each side of your design. This will give a finished height of 46 rows and will better fill the length of the pen.

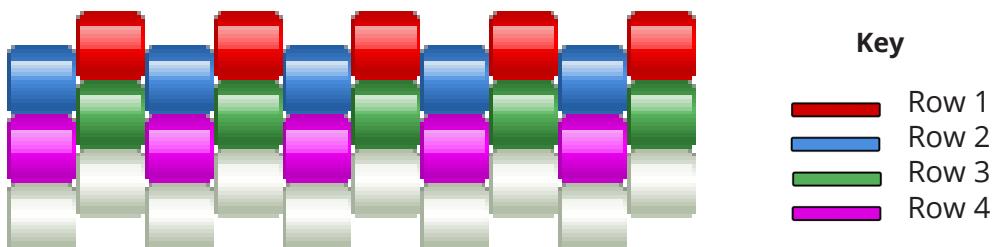

How To Read A Peyote Pattern

The rows of a peyote pattern are laid out as per the diagram below and are woven back and forth.

When starting your pattern, it is important to note that both rows 1 and 2 are threaded at the same time in the following order:

1st bead of **row 2**, 1st bead of **row 1**, 2nd bead of **row 2**, 2nd bead of **row 1**, 3rd bead of **row 2**,
3rd bead of **row 1** etc.

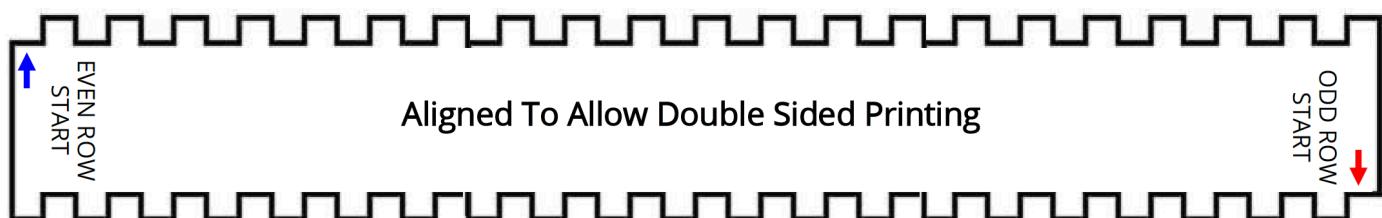

From there onwards, you will add the entirety of a row before moving on to the next.

Each row of the word charts in this pattern set are denoted by either an L or an R. This refers to the direction you will be working in this row. For example, if the row begins with an (L) you will be working **TOWARDS** the left. If a row is labelled with an (R) you will be working **TOWARDS** the right

PATTERN READER - CUT ME OUT

Cut out the pattern reader below. Lay it on top of your pattern with the text upright to reveal the beads of the next row. Flip the reader back to front to show the same row but covering the other side of the pattern.

Stopper Bead

Miyuki Delica Bead

→ Previously added path

→ Newly added path

- Using a needle and beading thread about 1.5m (1.5yd) in length, string one bead to act as a stopper, leaving a tail thread of about 15cm (6in). Loop back around the stopper and thread through it again in the same direction to secure it in place. **Diagram 1**

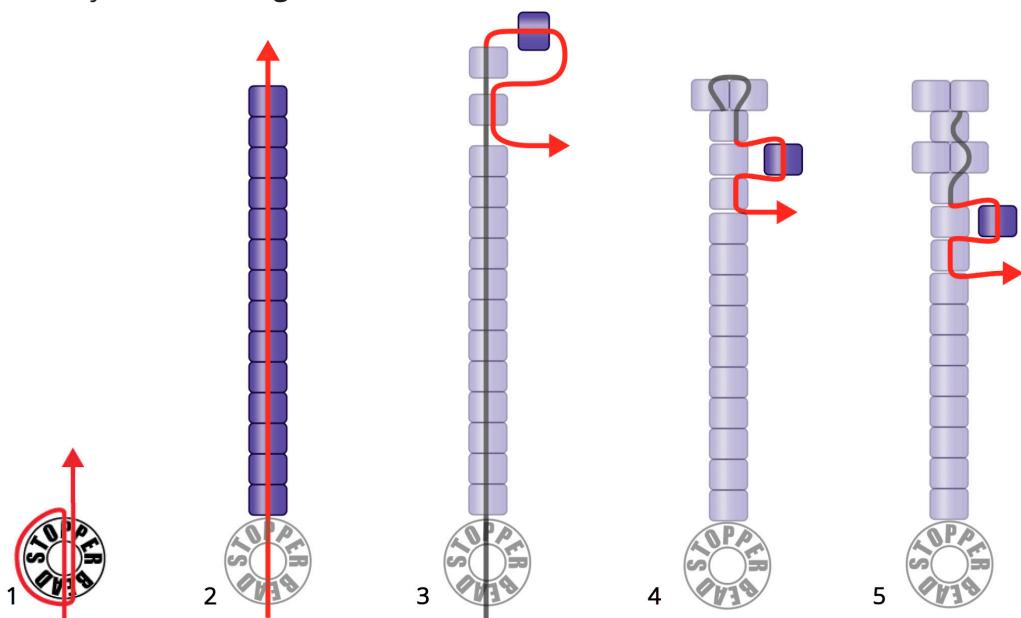

TIP: Use a bead of a different size, shape or colour to easily differentiate between it the rest of your beadwork.

- Following row 1 and 2 of your peyote pattern, thread on your Delica beads. beads are added in the following order: 1st bead of **row 2**, 1st bead of **row 1**, 2nd bead of **row 2**, 2nd bead of **row 1**, 3rd bead of **row 2**, 3rd bead of **row 1** etc. **Diagram 2**

- To add on the first bead of row 3 from your pattern, skip the last bead added in the previous step and pass through the second last bead. Pull the thread all the way through until the two beads sit neatly side by side. **Diagram 3**

- Continue by picking up the next bead in this row of your pattern. Skipping the next bead, threading through the following bead. Pull your thread tight so that the delicas sit neatly side by side. **Diagram 4**

- Repeat step 4 for all the remaining beads of this row. When you finish, your thread should be exiting from the very last bead at the end of your work. **Diagram 5**

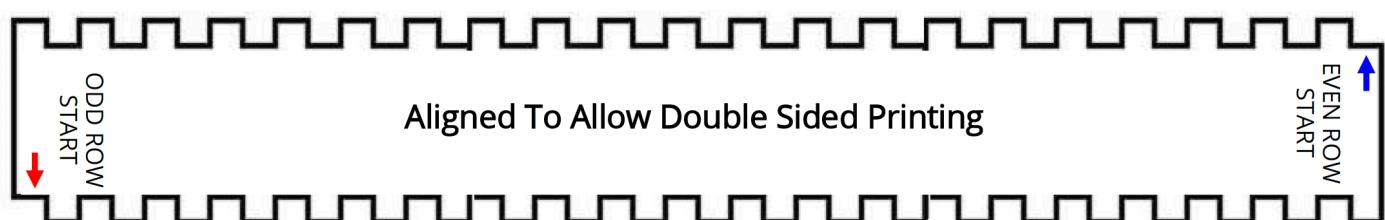

- Thread the first bead of your next row and begin weaving back in the other direction through the second bead. Pull the thread tightly until the bead sits neatly beside the others. Repeat this process until your thread is coming out of the very last bead at the other end. **Diagram 6 and 7**

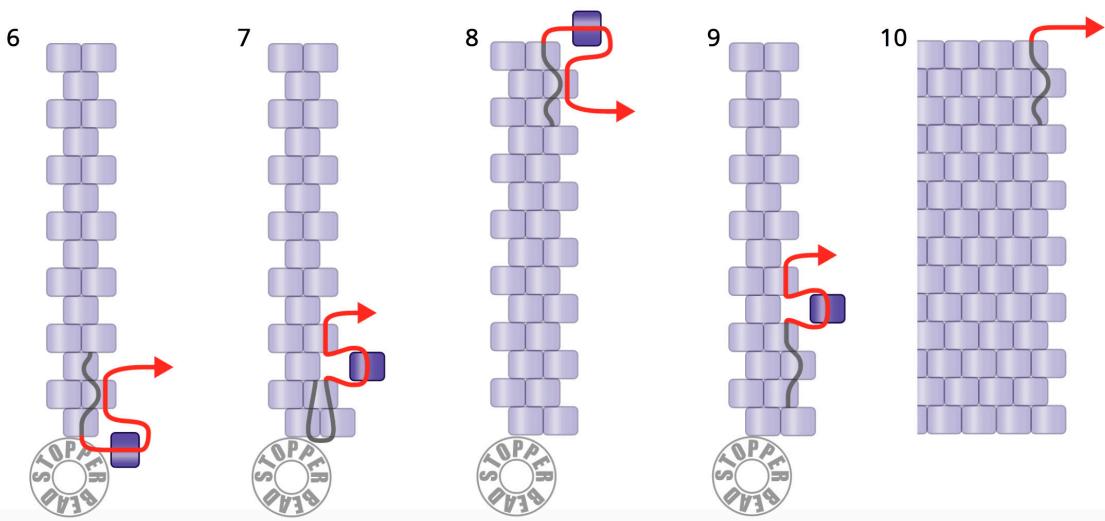

To make the weaving easier, flip your work over from top to bottom, allowing you to weave away from yourself. You can repeat this at the end of every row so that you are continually weaving in the same direction.

NOTE: If at any time find you are running out of thread you can extend your thread using a weavers knot. Alternatively, weave your remaining thread back through some of the beads of your bracelet, knotting along the way to secure it and cut off the excess. Repeat the same process to bring in a new thread.

- Continue to repeat step 6, weaving back and forth, following your pattern, until you complete the full length of your design. **Diagram 8, 9 and 10**

NOTE: If you wish to stitch your ends into a single piece, like a bangle, the last row your weave must finish on the opposite side to the stopper bead. This will allow you to fit the two ends together.

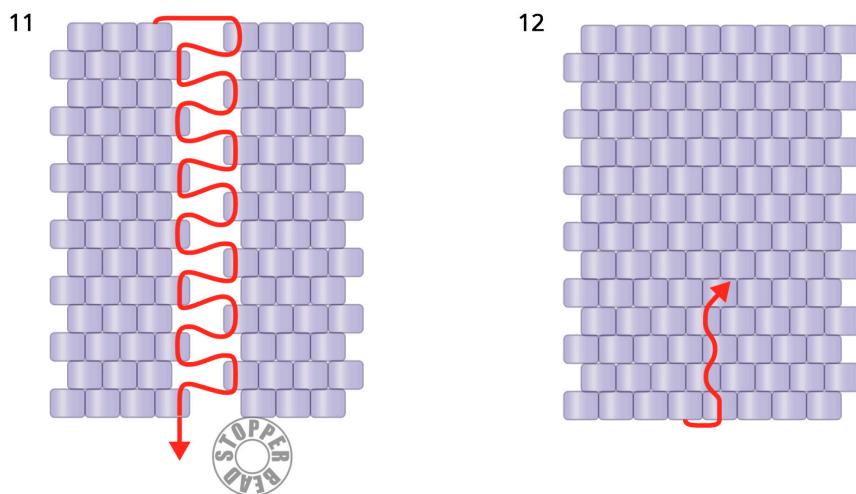

Zipping The Ends Together

8. Using the thread exiting from the end row, zip the two sides together by threading through the first protruding bead of row 1. Pull tightly before weaving through the next bead. Without adding beads, weave through the next protruding bead on the final row. Again pull tightly to bring the two together. Continue weaving all the way through until your design is completely closed into a tube. **Diagram 11**

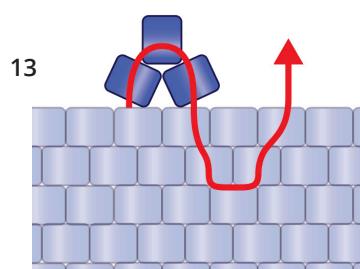

9. To complete your design, weave your thread up through the bead nearest the stopper. Continue through a few beads, tying occasional knots along the way. Weave through a few more beads and cut off the excess threads. Repeat this with your tail thread to finish. **Diagram 12**

Adding a beaded picot

10. Once you have zipped your ends together, ensure that your thread is exiting from the edge of your work. Pick up three beads, pass down into the bead beside and into the following bead in the row below. Pass back up through the bead directly beside and the bead above it so your thread is exiting from the edge row. If you examine your work, you should have skipped the edge row bead after where the picot is attached. **Diagram 13**

11. Repeat the previous step until you have 7 picots equally spaced around the top edge of your work. Repeat this process again on the bottom edge of your work so both ends of the tube have a row of picots.
